

Dear ALL,

**Women in Science and Engineering (WISE) Conference 2019**

In view of the low percentage of women in the science and engineering profession in Hong Kong, WISE Conference 2019 is at the forefront of the solution to provide a platform for joining all practitioners to tackle this industry-wide challenge.

Through one-day presentations and panel discussions on 19 October 2019, we aim at:

- enhancing the experience for women in science and engineering in Hong Kong and developing a meaningful community for women engineers/scientists;
- increasing the number of women choosing a career in science and engineering; and
- supporting those already in the industry to enable them to achieve their career goals.

Come and enjoy the conference for the knowledge and for Sustainable Development Goal – Gender Equality – to create a positive change and greater impact on our society.
